

How to unlock doors with the new 301 Congress app

1

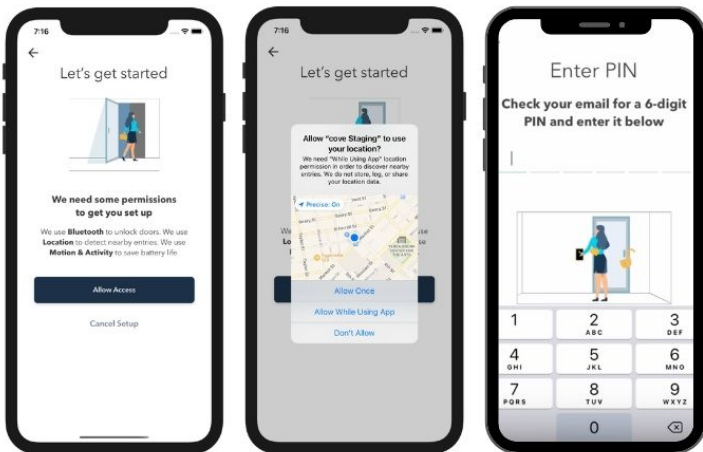

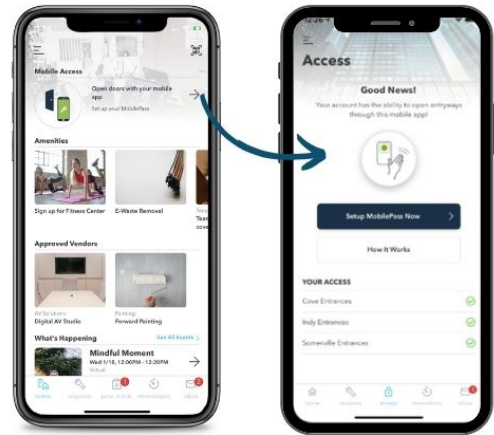

Download & Sign In

Download the app and sign in with your work email address. Check your email for a 6- digit login code to sign into the app.

2

Mobile Access

The app replaces physical keycards and the BlueHive app with touchless access to entrances and turnstiles. Mobile credentials are synced to the app, so you will only need ONE building app.

3

Grant Permissions

To get your MobilePass working, you will need to grant Bluetooth and Location "Always" permissions to the app. You will then be asked to Request a Pin. Enter this Pin to complete the setup.

4

Unlock Doors

If you've granted all permissions, just wave your hand in front of a reader to unlock a door. Having trouble? Ensure Bluetooth is on and try again with the app OPEN on your phone.
